

Electric Vehicle Charging Station (EVCS) Incentive Program

Kaua'i Contractors List

(Updated: 11/15/2022)

Hawai'i Energy is pleased to provide Electric Vehicle Charging Station (EVCS) incentives through funding by the State of Hawai'i Act 75 under contract with the Hawai'i Public Utilities Commission. In 2022, the Hawaii State Legislature passed Senate Bill 2720 that modifies the EVCS Rebate program to include the installation of new or retrofit of existing single-port, networked Level 2 stations in the eligible equipment category. The bill, which was signed into law by Gov. Ige in June 2022, also makes incentives available for qualified EVCS from July 1, 2022-June 30, 2023. As a result of increased funding, Hawaii Energy has lifted the cap on the amount of Level 2 rebates per site, as well as increased the cap of DC Fast Charger rebates to two per site. These modifications have been done to encourage more EVCS installations and upgrades statewide and support efforts to boost Hawaii's public charging network.

Visit our [EVCS webpage](#) to learn more!

Interested in taking advantage of this program? See below for the list of contractors offering EVCS services in Kaua'i county.

AC Electric LLC

Contact: Anthony Czeck
Address: PO Box 11022, Honolulu, HI 96828
